

Kai Zhang

Short-form Video Editor | Content Production

Portfolio: <https://ariyachan.github.io/freelance-work-samples/>

Profile

I create short-form edits and educational explainers, combining clear openings, pacing, captions, simple motion graphics and music. I can work from supplied footage and a defined brief, organize revisions, and prepare exports for the required platform.

Selected work

Educational short - duplicate order rows

A 24-second vertical explainer with narration, captions and simple motion. An independent demonstration using example order data.

<https://ariyachan.github.io/freelance-work-samples/#educational-short>

Desktop Reptiles - independent trailer edit

A 21-second gameplay edit with seven cuts, feature captions, instrumental music and a closing title. Created from footage of my own released Godot game.

Vertical quiz video

A 12-second silent typography and countdown demonstration.

Skills

- Short-form editing: shot selection, hooks, pacing, captions, transitions and audio mixing.
- Content support: post outlines, captions, editorial calendars and organized delivery notes.
- Technical production: FFmpeg and Python for editing, export checks and repeatable asset preparation.
- Development: Godot, HTML, CSS and JavaScript; full-stack developer of Desktop Reptiles.

Working approach

Start with the brand, audience, supplied assets and required output. Agree the workload, review process and delivery dates, then deliver files and keep revisions organized. The work above is independently created portfolio work.
